

Since our partnership with Telikin last year, there has been a tremendous amount of interest from our membership

On Saturday, February 9th, Cary SeniorNet instructor John Fitzpatrick, hosted a webinar presentation on Telikin Touchscreen Computers. Nancy Allegranza, RN, Telikin's Director of Marketing, discussed the history and benefits of computing with Telikin. She also offered a demonstration of the Telikin touch screen computer to 25 participants.

Other centers have had the opportunity to use and explore this new technology. This is a fantastic product for everyone - seniors, baby boomers, the young, and those that are impaired.

For more information on Telikin, visit www.Telikin.com . If you are interested in a presentation for your center, please contact Nancy Allegranza at Telikin Sales, 267-954-0102.

Members, volunteers work with your Coordinators to get your center on the list for this exclusive SeniorNet benefit.

A SeniorNet member testing out the Telikin at the Council House SeniorNet Center in Maryland.

Sincerely,

Leslie M. Smith
Chairman
